

PROGVISION DIGITAL — TRAINING PROGRAM

DAY 2

Lead Scraping Foundations

Focus: Google Maps & Directory Sources

progvision.online • instademox.space

MSME Registered Enterprise

DAY 2 • SECTION 1

Introduction to Lead Generation

Lead generation is the systematic process of identifying and collecting information about potential customers who may be interested in your product or service. At ProgVision, lead generation is the engine that powers the entire sales pipeline — without quality leads, there are no demos, no conversions, and no revenue.

Your job as part of the lead generation team is to find local businesses in your assigned city that do not have a website, have an outdated website, or have a poor online presence — and then collect their contact information so the outreach team can begin conversations about InstaDemoX.

30 Leads

Day 2 Target

**Google
Maps**

Primary Source

5+ types

Industries

100%

CRM Accuracy

What Is a Quality Lead?

Not every business you find on Google Maps is a good lead. A quality lead meets the following criteria — businesses that do not meet these criteria should still be logged but flagged as lower priority.

Criteria	Why It Matters
No website or website link missing from Maps listing	Highest priority — they have zero digital presence and need InstaDemoX most urgently
Website present but clearly outdated (pre-2018)	High priority — their site likely isn't mobile-friendly; InstaDemoX is a major upgrade
Google rating 3.5 or above	Means the business is legitimate, serving real customers, and has growth potential
Business has 20+ reviews on Google Maps	Indicates steady customer volume — they can afford and benefit from a subscription
Phone number visible on Maps listing	You can make direct outreach — businesses without numbers are harder to reach
Business is within your assigned city boundary	Ensures coverage consistency across the team; do not overlap other members' areas

DAY 2 • SECTION 2

Google Maps Scraping — Step-by-Step

Google Maps is your primary lead sourcing tool for Day 2. Follow this exact process for every business you research. Speed comes with practice — by the end of Day 2 you should be able to log a complete lead entry in under 3 minutes.

- 1 Open Google Maps (maps.google.com) in your browser. Sign in with your Google account for full access to business details.
- 2 In the search bar, type your industry keyword + city name. Example: 'restaurants in Vijayawada' or 'salons in Tirupati'.
- 3 Click through the listing results — do NOT use the map view initially. The list view on the left panel is faster.
- 4 Click on each business listing to open its detail panel on the right side of the screen.
- 5 Check the 'Website' field in the business panel. If there is no website link listed, this is a Priority 1 lead.
- 6 Note the Google rating (shown as stars and a decimal number) and the review count in brackets.
- 7 Copy the business name, address, and phone number from the listing.
- 8 Check if the business has a WhatsApp link in the listing — if they do, note it as 'WhatsApp Available: Yes'.
- 9 Open a new tab — paste the website URL (if they have one) and quickly check if it loads on mobile view (use Chrome DevTools F12 > toggle device). If it looks broken or is desktop-only, mark it as 'Outdated Website'.
- 10 Enter all collected data into the shared CRM Google Sheet in the correct columns.

■ **Do NOT enter duplicate businesses in the CRM. Before adding a new entry, scroll the sheet quickly to confirm the business name does not already appear. Duplicates waste outreach effort and lower your CRM accuracy score.**

DAY 2 • SECTION 3

CRM Data Fields — Complete Reference

Every lead you enter into the CRM sheet must have all required fields filled. Incomplete entries reduce the effectiveness of the outreach team and lower your CRM accuracy score on Day 7 evaluation.

Field	Required ?	How to Find It	Example
Business Name	YES	Google Maps listing title	Sri Balaji Restaurant
Industry / Category	YES	Maps listing category below name	Restaurant
Address	YES	Maps listing address field	Gandhi Road, Tirupati, AP
City	YES	Your assigned city	Tirupati
Phone Number	YES	Maps listing phone field	+91 9876543210
WhatsApp Available	YES	Check Maps listing for WA link	Yes / No / Unknown
Google Rating	YES	Star rating shown in listing	4.3
Review Count	YES	Number in brackets next to rating	147
Website Status	YES	Check if website link exists + works	No Website / Outdated / Active
Priority Level	YES	Based on website status + rating	High / Medium / Low
Notes	Optional	Any relevant observation	Owner mentioned WhatsApp only

Priority Level Assignment Guide

Priority	Criteria	Expected Response Rate
HIGH	No website + rating 3.5+ + 20+ reviews + phone available	25-40%
MEDIUM	Outdated website OR missing some contact details	10-20%
LOW	Active modern website but phone available for future upsell	3-8%

DAY 2 • SECTION 4

Target Industries for Day 2

On Day 2 you will focus exclusively on Google Maps for your assigned city. Cover at least 5 of the following industry categories to build a diverse lead database. Each category has specific search terms to use in Google Maps.

Industry	Search Terms to Use	Avg. Leads per Search
Restaurants & Food	'restaurants in [city]', 'tiffin centers [city]', 'fast food [city]', 'biryani [city]'	15-30
Salons & Beauty	'salons in [city]', 'beauty parlours [city]', 'mens salon [city]', 'spa [city]'	10-20
Hotels & Lodges	'hotels in [city]', 'guest house [city]', 'lodge [city]', 'stay [city]'	8-15
Medical Clinics	'clinic in [city]', 'doctor [city]', 'dental clinic [city]', 'ENT [city]'	10-25
Gyms & Fitness	'gym in [city]', 'fitness center [city]', 'crossfit [city]', 'yoga [city]'	8-15
Retail Shops	'clothing store [city]', 'electronics shop [city]', 'furniture [city]'	12-20
Educational	'coaching center [city]', 'tuition [city]', 'institute [city]'	10-18

EFFICIENCY TIP

Open multiple browser tabs — one for Maps search results and one for the CRM sheet. Use keyboard shortcuts (Ctrl+Tab to switch, Ctrl+C to copy) rather than right-clicking. This can double your speed. A well-practiced lead researcher can process 10-15 leads per hour.

Common Mistakes to Avoid

- Entering the same business twice under slightly different name spellings.
- Logging a business as 'No Website' without actually checking the Maps listing for a website link.
- Skipping the priority level field — this is used by the outreach team to triage their calls.
- Entering only high-rated businesses and ignoring 3.5-4.0 rated ones — these are often the most motivated buyers.
- Not checking if a phone number is active — some Maps listings have disconnected numbers.
- Filling in the CRM in batches at end of day instead of in real-time — memory errors increase significantly.

DAY 2 • SECTION 5

Lead Quality vs. Lead Quantity

A common mistake for new lead researchers is optimizing for quantity over quality. Entering 60 low-quality leads with missing fields is less valuable than entering 30 high-quality leads with complete, verified information. The outreach team's time is limited — every call or WhatsApp message they send to a dead number or wrong business is wasted effort.

Low-Quality Lead	High-Quality Lead
Business name only — no phone	Business name + phone + WhatsApp confirmed
No website status checked	Website status confirmed by visiting URL
Rating not recorded	Rating (4.2) and review count (87) both noted
Priority field left blank	Priority marked HIGH with justification in notes
Address vague ('Tirupati')	Full address ('15 Gandhi Road, Tirupati, AP 517501')
Category left as 'Business'	Category specific: 'South Indian Restaurant'

Verifying Phone Numbers

Where possible, verify that a phone number is active before entering it into the CRM. The easiest way to do this is to save the number in WhatsApp and check if a WhatsApp profile appears. If it does, mark 'WhatsApp Available: Yes' and the number is almost certainly active. This saves the outreach team from wasting messages on dead numbers.

■ **Do NOT call any phone numbers during the lead collection phase. Your role today is research only. All outreach calls and messages will happen from Day 4 onwards using ProgVision-approved scripts.**

Maintaining Research Momentum

Lead scraping can become mentally repetitive. Here are techniques to maintain quality and speed across a full day of research:

- Work in 45-minute focused blocks followed by a 10-minute break.
- Set a target of 8 leads per 45-minute block — this naturally keeps your pace at 30 by end of day.
- Play background music without lyrics to maintain focus without distraction.
- Switch between industry categories every 2 hours to avoid monotony and coverage gaps.
- Screenshot any unusually interesting or high-value businesses and share in the team group for acknowledgment.

DAY 2 • SECTION 6

Understanding Your Assigned City

Every trainee is assigned a specific city or locality to research. This city assignment is determined by your training coordinator before Day 2 begins. The purpose of assigning cities is to ensure comprehensive national coverage and eliminate duplication across the team.

YOUR CITY ASSIGNMENT

Your assigned city will be communicated by your supervisor via WhatsApp or the portal before Day 2 starts. If you have not received your city assignment, contact support@progvision.online immediately.

Once assigned, you are responsible for providing comprehensive coverage of that city across Days 2, 3, and 6. Your final deliverable on Day 7 will include a city coverage report.

How to Map Your City for Maximum Coverage

- 1 Open Google Maps and search your city name. Note the major neighbourhoods, markets, and commercial areas.
- 2 Identify the main commercial streets, bazaars, malls, and industrial areas — these have the highest density of businesses.
- 3 Plan your scraping in geographic zones — start from the city centre and work outward.
- 4 Keep a separate note of neighbourhoods you have already covered so you do not repeat searches.
- 5 By Day 6, you should have covered at least 70-80% of the city's commercial areas.

Area Type	Expected Business Density	Priority
Main Bazaar / City Centre	Very High (50-100 businesses per km)	Start here on Day 2
Commercial Street / MG Road equivalent	High (30-60 businesses per km)	Day 2-3
Residential neighbourhoods	Medium (10-25 businesses per km)	Day 3
Industrial estates / Business parks	Medium (varies by sector)	Day 3-6
Outskirts / Suburban areas	Low-Medium	Day 6 coverage review

DAY 2 • SECTION 7

CRM Sheet — Field-by-Field Walkthrough

Your supervisor will share the team CRM Google Sheet link with you on Day 2. Here is a complete walkthrough of how to use it correctly from the first entry.

- 1 Open the shared Google Sheet link. Do NOT create your own separate sheet — all entries must go into the team sheet.
- 2 Navigate to the tab with your assigned city name. If a tab does not exist for your city, ask your supervisor to create one.
- 3 Each row represents one business lead. Start from the first empty row — do not overwrite any existing entries.
- 4 Fill in each column in order from left to right. Do not skip columns — type 'N/A' or 'Unknown' rather than leaving any cell blank.
- 5 Use consistent formatting: all phone numbers in format +91XXXXXXXXXX, all ratings as decimals (4.2 not '4.2 stars'), all dates in DD/MM/YYYY format.
- 6 After every 10 entries, sort the sheet by Business Name to catch any duplicates before they accumulate.
- 7 At end of each day, add a row with your name, the date, and total lead count entered that day — this is your daily progress marker.

✓ Target for Day 2: 30 fully completed, verified lead entries in the CRM sheet by 8:00 PM. Quantity matters, but every entry must be complete — no blank required fields.

Day 2 Checklist

- Received city assignment from supervisor before starting.
- Opened shared CRM Google Sheet and located your city tab.
- Planned city coverage zones — identified main commercial areas to target first.
- Searched at least 5 different industries on Google Maps.
- Verified website status for every business logged (not assumed).
- Checked WhatsApp availability for every phone number logged.
- Logged minimum 30 complete, verified leads.
- Marked priority level (High/Medium/Low) for every entry.
- Added end-of-day summary row with name, date, and lead count.
- Shared screenshot of lead count with supervisor on WhatsApp.

DAY 2 • DELIVERABLE

Day 2 Summary & Deliverable

EXPECTED DELIVERABLE

Minimum 30 verified, fully completed leads entered into the shared CRM Google Sheet from Google Maps research of your assigned city.

WHAT YOU LEARNED TODAY

Topic	Key Takeaway
Quality vs Quantity	30 complete leads > 60 incomplete entries
Google Maps Mastery	Step-by-step process for extracting all business data fields
CRM Protocol	100% field completion, consistent formatting, no duplicates
Priority System	High/Medium/Low based on website status, rating, and contact availability
City Strategy	Zone-based coverage starting from commercial centre outward
Industry Coverage	5+ industries covered for a diverse pipeline

✓ Day 2 complete. Report your final lead count to your supervisor tonight. Day 3 begins multi-source collection — your target grows to 70+ total leads.

Day 2 — Lead Scraping Foundations

Key Item	Detail
Company	ProgVision Digital — MSME Registered
Product	InstaDemoX — AI website generator in 15 seconds
Website	progvision.online
Product URL	instademox.space
Support Email	support@progvision.online
Phone	+91 7814201332
Admin Email	admin@progvision.online
Pricing — Starter	Rs. 499/month — 1 site, WhatsApp, Google Maps
Pricing — Business	Rs. 999/month — custom domain, cloud hosting
Pricing — Agency	Rs. 2,499/month — 10 sites, SEO, dedicated support
Training Pass Threshold	60% minimum across all 5 evaluation parameters
Day 2 CRM Target	30+ verified leads
Day 3 CRM Target	70+ total leads (multi-source)
Day 4 Outreach Target	20+ WhatsApp messages sent and logged
Day 5 Demo Target	3 demo conversations OR 1 meeting scheduled
Day 6 CRM Target	100+ leads, 70%+ fill rate
Day 7 Submission	Training report to supervisor + support@progvision.online
