

PROGVISION DIGITAL — TRAINING PROGRAM

DAY 3

Multi-Source Lead Collection

Focus: JustDial, IndiaMART, Yellow Pages & Social Media

progvision.online • instademox.space

DAY 3 • SECTION 1

Expanding Beyond Google Maps

Day 2 gave you a solid foundation in Google Maps scraping. Day 3 is about scale and diversity — you will now add four additional data sources to your research toolkit, each of which surfaces different segments of the local business market that Google Maps may not fully cover.

40 New

Day 3 Target

70+ Leads

De-dup Check

Why Multiple Sources Matter

Different business owners maintain their presence on different platforms. A restaurant owner may be active on JustDial but not Google Maps. A small manufacturer may be listed on IndiaMART but have no Google presence. A home-service business may primarily advertise in Facebook local groups. Covering multiple sources ensures you reach a broader, more representative sample of local businesses.

Source	Best For	Unique Advantage
JustDial	Restaurants, salons, clinics, home services, retail	Largest local business directory in India — phone numbers almost always verified
IndiaMART	Manufacturers, wholesalers, B2B suppliers, exporters	High-value B2B leads who may need websites for international buyers
Sulekha	Home services, contractors, tutors, caterers	Service-based businesses not well represented on Google Maps
Yellow Pages India	Established businesses, professional services, offices	Older businesses with outdated or no digital presence
Facebook Groups	Restaurants, event services, local retail, home businesses	Businesses actively promoting but with no formal website

DAY 3 • SECTION 2

JustDial — Deep Dive Guide

JustDial (justdial.com) is India's largest local business search and discovery platform with over 30 million listed businesses. It is one of the most reliable sources of verified business contact information for Indian SMBs.

How to Use JustDial for Lead Scraping

- 1 Go to justdial.com and set your city in the location field at the top of the page.
- 2 Search for your industry keyword — example: 'restaurants', 'beauty salons', 'dental clinics'.
- 3 JustDial shows listings with star ratings, review counts, phone numbers (partially masked), and address.
- 4 To see the full phone number, you must either click 'Call' (which reveals the number on screen) or create a free JustDial account.
- 5 Note whether the listing has a website link — most JustDial listings do NOT have a website link, making them ideal InstaDemoX prospects.
- 6 Check the JustDial rating (out of 5) and review count as additional data points.
- 7 Enter all relevant data into the CRM sheet, marking the Source column as 'JustDial'.

JUSTDIAL ADVANTAGE

JustDial listings often include mobile numbers directly (which are WhatsApp-enabled), verified business categories, years in business, and occasionally owner names. This extra data significantly improves outreach personalization.

IndiaMART — B2B Lead Mining

IndiaMART (indiamart.com) is India's largest B2B marketplace. While primarily a sourcing platform, it is an excellent source for manufacturers, distributors, and wholesalers who need professional websites to attract international buyers.

- Search IndiaMART for your city + industry: example 'food products Vijayawada' or 'furniture manufacturer Hyderabad'.
- Each listing shows the company name, location, product categories, and a 'Call Supplier' option.
- IndiaMART businesses typically have higher average revenue than B2C local businesses — making them viable for the Agency plan.
- Note whether they have a dedicated website (separate from their IndiaMART profile) — many do not.
- Mark all IndiaMART leads with Source: 'IndiaMART' and Industry: 'B2B/Manufacturing'.

DAY 3 • SECTION 3

Facebook Local Business Groups

Facebook local business groups are an often-overlooked but highly productive source of leads — particularly for food businesses, home services, event management, and creative services. These are businesses actively trying to promote themselves on social media but lacking a professional website.

Finding the Right Facebook Groups

- 1 Open Facebook and search: '[your city] business', '[your city] restaurants', '[your city] local sellers'.
- 2 Join the top 3-5 groups that appear. Most groups approve members within hours.
- 3 Once inside, browse posts from business owners promoting their services.
- 4 Note the business name, what they sell, their Facebook page link (if they have one), and any phone numbers in the post.
- 5 Check if they have a website mentioned in their posts or Facebook page — most will not.
- 6 These are high-motivation leads — they are already actively marketing, which means they understand the value of visibility.

Business Type	Signs They Need InstaDemoX	Approach Angle
Home baker / caterer posting photos	No website, all orders on WhatsApp	'Your food looks amazing — a website would bring you more orders'
Tuition / coaching post	Just a phone number in the post	'Parents search Google for coaching — a site puts you there'
Restaurant promo post	Facebook page only, no website	'Your Google Maps listing shows 4.6 stars — claim your free website demo'
Event decorator advertising	Images + WhatsApp number only	'Couples search for decorators online — your portfolio deserves a website'
Clothing / boutique seller	Instagram + WhatsApp shop only	'Grow beyond Instagram — claim your website and get found on Google'

DAY 3 • SECTION 4

Data De-Duplication — Critical Process

By Day 3 your CRM sheet will have over 30 entries from Day 2. Before adding any new entry today, you must first check that the business does not already exist in the sheet. Duplicate entries are one of the most common quality issues in lead databases and significantly reduce outreach efficiency.

De-duplication Methods

- 1 Use Google Sheets' built-in search (Ctrl+F) to search for the business name before adding it.
- 2 Search by phone number — the same business may appear under slightly different names on different platforms.
- 3 If you find a duplicate with a different source but the same phone number, update the existing entry's 'Additional Sources' field rather than creating a new row.
- 4 At the end of Day 3, use the 'Remove Duplicates' feature in Google Sheets: Data menu > Data cleanup > Remove duplicates.
- 5 Cross-check by phone number as a final pass — sort the sheet by phone number column to catch number duplicates.

■ A CRM sheet with 70 unique, verified entries is significantly more valuable than a sheet with 100 entries containing 20 duplicates. Quality is always the primary metric.

Source Attribution — Tracking Where Leads Come From

Every entry in the CRM must have a 'Source' column entry. This data is analyzed by the team to understand which platforms yield the highest-quality leads and conversion rates over time.

Source Value	When to Use
Google Maps	Business found and data collected from Google Maps
JustDial	Business found via JustDial listing
IndiaMART	Business found via IndiaMART supplier listing
Sulekha	Business found via Sulekha service listing
Yellow Pages	Business found via Yellow Pages India
Facebook Group	Business found in a Facebook local business group
LinkedIn	Business found via LinkedIn company page (Day 4+)

DAY 3 • SECTION 5

Identifying the Best InstaDemoX Prospects

Not all businesses in your CRM will be equally receptive to InstaDemoX. By Day 3 you should be developing an instinct for which leads are likely to convert. Here is a detailed breakdown of what high-conversion prospects look like across different segments.

Segment	Conversion Indicators	Primary Pain Point
Restaurants (3.8-4.5 rating, 50-300 reviews, no website)	Steady customer base, visible food photos on Maps, WhatsApp number listed	Losing orders to competitors with Swiggy-independent websites
Salons (4.0+ rating, female owner/operator)	Active Instagram, no Google website, WhatsApp bookings	Appointment bookings coming only through calls — no online booking
Clinics (any specialization, established 3+ years)	Multiple doctors listed, significant review volume	Patients searching 'doctor near me' but not finding them
Hotels (family-run, 10-50 rooms)	Active on Booking.com but no independent site	Losing direct bookings to OTA commission fees
Gyms (established 1-5 years)	Equipment visible in photos, multiple staff	Members lost when Google search returns competitor first
Coaching centers (any subject)	Existing Facebook presence but no formal site	Student enquiries dropping due to no online presence

Businesses to Deprioritize

- Businesses with active, modern, mobile-friendly websites — they are not immediate InstaDemoX targets (flag for future upsell check-in).
- Businesses with fewer than 10 Google reviews — limited customer base, lower likelihood of monthly subscription.
- Permanently closed businesses — Google Maps sometimes shows closed businesses in search results.
- Businesses listed as 'Temporarily closed' for more than 3 months.
- National chain outlets (McDonald's, Domino's, Reliance Trends) — they have corporate web teams and are not our target market.

DAY 3 • SECTION 6

Sulekha & Yellow Pages — Quick Reference

Sulekha (sulekha.com)

Sulekha specializes in home services, contractors, tutors, wedding vendors, and local service providers. Many Sulekha-listed businesses are micro-enterprises with no digital presence beyond their Sulekha profile.

- 1 Visit sulekha.com and set your city in the location filter.
- 2 Browse categories: Home Improvement, Personal Care, Education, Events, Health & Wellness.
- 3 Each listing shows a business description, rating, and partial phone number (revealed on clicking).
- 4 Note that Sulekha listings often include the number of enquiries received — businesses with high enquiry counts are highly motivated prospects.
- 5 Mark source as 'Sulekha' in CRM.

Yellow Pages India (yellowpages.in)

Yellow Pages India is a legacy directory platform most commonly used by established businesses that have been operating for 10+ years. These businesses often have the most outdated or non-existent web presence.

- 1 Visit yellowpages.in and use the search bar with city + industry keyword.
- 2 Listings show business name, category, address, and phone number.
- 3 The absence of a website link on a Yellow Pages listing is almost universal — this makes every non-duplicate entry a viable lead.
- 4 Pay attention to the business address — Yellow Pages sometimes lists head office addresses which may differ from the operating location.
- 5 Mark source as 'Yellow Pages' in CRM.

DAY 3 EFFICIENCY STRATEGY

Do not try to exhaustively scrape all platforms. Instead, aim for 10 leads from JustDial, 8 from Facebook groups, 10 from Sulekha, 5 from Yellow Pages, and 7 from any combination — totalling your 40 new entries. A diverse source mix gives the outreach team richer data to personalize their messages.

DAY 3 • SECTION 7

Building a Repeatable Research System

By the end of Day 3, you should have developed a personal system for lead research that you can repeat efficiently. The best lead researchers treat this like a production process — consistent inputs produce consistent outputs.

Recommended Daily Research Workflow

Time Block	Activity	Target Output
9:00 AM – 10:30 AM	Google Maps — main commercial area of city	12-15 leads
10:30 AM – 10:45 AM	Break + duplicate check on morning entries	0 duplicates remaining
10:45 AM – 12:30 PM	JustDial — 2-3 industry categories	10-12 leads
12:30 PM – 1:30 PM	Lunch break	
1:30 PM – 3:00 PM	Facebook local business groups	8-10 leads
3:00 PM – 4:30 PM	Sulekha + Yellow Pages	8-10 leads
4:30 PM – 5:00 PM	Final de-duplication, field completion check	100% fields filled
5:00 PM – 5:30 PM	Day summary entry + supervisor update	Report sent

Day 3 Checklist

- Added 40+ new leads from at least 3 different sources (not just Google Maps).
- Run de-duplication check — no duplicate phone numbers in CRM.
- Source column filled for every entry.
- Total CRM count now at 70+ verified entries.
- Priority levels assigned to all new entries.
- End-of-day row added with date, name, and count.
- Update sent to supervisor on WhatsApp.

DAY 3 • DELIVERABLE

Day 3 Summary & Deliverable

EXPECTED DELIVERABLE

40 new leads added from at least 3 non-Google Maps sources. Total CRM pipeline reaches 70+ leads with zero duplicates and 100% field completion.

WHAT YOU LEARNED TODAY

Topic	Key Takeaway
Multi-Source Research	JustDial, IndiaMART, Sulekha, Yellow Pages, Facebook Groups each surface different business segments
De-duplication	Always check by phone number before adding new entries; duplicates waste outreach effort
Source Attribution	Every entry tagged with source for conversion tracking analysis
Prospect Profiling	Not all leads are equal — high-conversion indicators identified for each segment
Research System	Time-blocked workflow delivers consistent 40-50 quality leads per day

✓ **Day 3 complete. You now have 70+ leads in your pipeline. Day 4 brings the first real client contact — WhatsApp and email outreach using ProgVision-approved scripts.**

Day 3 — Multi-Source Lead Collection

Key Item	Detail
Company	ProgVision Digital — MSME Registered
Product	InstaDemoX — AI website generator in 15 seconds
Website	progvision.online
Product URL	instademox.space
Support Email	support@progvision.online
Phone	+91 7814201332
Admin Email	admin@progvision.online
Pricing — Starter	Rs. 499/month — 1 site, WhatsApp, Google Maps
Pricing — Business	Rs. 999/month — custom domain, cloud hosting
Pricing — Agency	Rs. 2,499/month — 10 sites, SEO, dedicated support
Training Pass Threshold	60% minimum across all 5 evaluation parameters
Day 2 CRM Target	30+ verified leads
Day 3 CRM Target	70+ total leads (multi-source)
Day 4 Outreach Target	20+ WhatsApp messages sent and logged
Day 5 Demo Target	3 demo conversations OR 1 meeting scheduled
Day 6 CRM Target	100+ leads, 70%+ fill rate
Day 7 Submission	Training report to supervisor + support@progvision.online
