

PROGVISION DIGITAL — TRAINING PROGRAM

DAY 6

Deep Scrape & City Coverage Review

Focus: Expanding Coverage Across Assigned City

MSME Registered Enterprise

DAY 6 • SECTION 1

City Coverage Strategy

Day 6 is your final intensive research day. By end of day, your CRM should contain a minimum of 100 leads with at least 70% of entries fully completed across all required fields. This is also the day you conduct a coverage audit — systematically reviewing which parts of your assigned city you have covered and which remain.

What Is a Coverage Audit?

A coverage audit is a systematic review of the geographic and industry coverage of your CRM. It answers two questions: (1) Which areas of the city have I NOT researched yet? (2) Which industries am I under-represented in?

- 1 Open your CRM and create a filter showing only the 'Address' and 'Industry' columns.
- 2 Group entries by neighbourhood or street name to see which areas are well-covered.
- 3 Identify blank areas — neighbourhoods, markets, or zones with fewer than 5 entries.
- 4 Create a list of uncovered areas to research today.
- 5 Simultaneously, count entries by industry category — any category with fewer than 5 entries is under-represented.
- 6 Prioritize uncovered geographic areas first, then fill industry gaps.

DAY 6 • SECTION 2

High-Density Commercial Areas — Research Focus

For Day 6, focus your research on high-density commercial areas that yield the most leads per hour of research time. These areas typically have 30-100 businesses per square kilometre and are the most productive zones for lead sourcing.

Area Type	What to Search	Expected Yield
Main Bazaar / Old City Market	All categories — restaurants, jewellers, clothing, services	40-60 leads per 2 hours
Food Street / Restaurant Row	Restaurants, chaat stalls, sweet shops, cafes, bakeries	25-35 leads per hour
Medical Hub / Hospital Area	Clinics, pharmacies, labs, dental, physiotherapy, opticians	20-30 leads per hour
Industrial Estate / MSME Cluster	Manufacturers, suppliers, B2B businesses on IndiaMART	15-20 leads per hour
Educational Zone / College Area	Coaching centers, stationery, hostels, cheap food joints	20-30 leads per hour
Shopping Mall Perimeter	Retail, beauty, food, services in mall vicinity	25-35 leads per hour
Residential Township	Local shops, clinics, home services, petrol pumps	10-15 leads per hour

PRO TIP — SATELLITE VIEW STRATEGY

Switch Google Maps to Satellite view and zoom into your assigned city at street level. You can literally see clusters of commercial buildings, shop fronts, and market areas that do not appear in standard keyword searches. Use this to discover uncovered commercial zones and then switch back to map view to search them.

DAY 6 • SECTION 3

CRM Data Refinement — Quality Pass

The second major task of Day 6 is conducting a quality pass on your existing CRM entries. Over Days 2-5, you may have left some fields incomplete, used inconsistent formatting, or entered data that needs verification. Today is the day to fix all of that.

The 10-Point Data Quality Checklist

- Every entry has a Business Name — no blank rows, no 'Unknown' in this field.
- Every phone number is in the format +91XXXXXXXXXX (10 digits after country code).
- Every entry has a Google rating recorded (3.0 – 5.0 scale).
- Every entry has a review count (minimum '0' if no reviews).
- Website Status is marked for every entry: No Website / Outdated / Active.
- WhatsApp Available is marked: Yes / No / Unknown — never blank.
- Priority Level is assigned: High / Medium / Low.
- Source column is filled for every entry: Google Maps / JustDial / Facebook / etc.
- No duplicate phone numbers exist in the sheet (check by sorting by phone column).
- Outreach status is updated for all contacted businesses from Days 4-5.

Flagging Priority Leads for Post-Training Handover

After your training week ends, your CRM data is handed over to the permanent outreach team. To maximize the value of your work, flag your top 20 most promising leads with a 'PRIORITY FLAG' marker. These are the leads most likely to convert to paid subscribers.

Priority Flag Criteria	Why It Matters
Google rating 4.0+ with 50+ reviews	Established business with proven customer base — can afford subscription
No website AND WhatsApp available	Highest pain point + easiest to contact — perfect InstaDemoX candidate
Already responded positively to outreach	Warm lead — close to conversion with one more touchpoint
Business in rapidly growing category	Gyms, coaching centers, boutique hotels — high growth = high need
B2B manufacturer on IndiaMART with no site	International buyers require a website — strong financial motivation

DAY 6 • SECTION 4

Advanced Scraping Techniques

By Day 6 you should be comfortable with basic scraping. Here are advanced techniques that experienced lead researchers use to extract data faster and find leads that others miss.

1. Google Maps 'Nearby' Feature

When you click on a business in Google Maps, the panel shows a 'Nearby' or 'People also search for' section. This surfaces businesses of the same type in the immediate vicinity — perfect for finding dense clusters of similar businesses you may have missed.

2. Google Maps Photo Exploration

Many Google Maps listings have user-uploaded photos that reveal the business's interior, signage, and menu boards. This helps you assess business size, quality, and investment capacity — useful for prioritization even when the Google rating is low.

3. Search Operator Combinations

In Google Maps search, try combining terms for more specific results: 'authentic biryani Tirupati', '24 hours pharmacy Vijayawada', 'AC rooms below 1000 Hyderabad'. Specific searches surface businesses with niche offerings — these tend to have higher motivation for a professional online presence.

4. JustDial Category Navigation

Instead of searching by keyword, navigate JustDial by category tree: Restaurants > By Cuisine > South Indian > Your City. This surfaces categories of businesses you may not have thought to search for and systematically covers the full market.

5. Facebook Group Post Date Filter

In Facebook groups, filter posts by 'New Activity' to find businesses that posted recently. A business posting a promotion today is far more likely to be active and receptive than one whose last post was 6 months ago.

■ **Advanced scraping is useful but do not let it slow you down in pursuit of perfection. Your target is 100+ leads — keep moving. Flag interesting advanced finds with a note and return to deep research only after reaching the 100-lead target.**

DAY 6 • SECTION 5

Continuing Outreach on Day 6

Even though Day 6 is primarily a deep scrape day, you should continue managing your active outreach pipeline. HOT leads from Days 4-5 should receive follow-up today if they have not yet converted. Any meeting booked on Day 5 may be happening today.

Lead Status	Day 6 Action
HOT — Demo sent, no reply in 24h	One gentle follow-up: 'Just checking — did you get a chance to view your demo?'
Meeting booked for today	Attend the call, run the 5-step demo script from Day 5
Said 'send more info'	Send the email template from Day 4 with the demo link
Interested but not ready	Note 'follow up Day 7' — one more touch before training ends
Not Interested	Mark closed — do not contact again

Day 6 CRM Milestone — 100 Leads

Reaching 100 verified entries in your CRM by end of Day 6 is the quantitative milestone for your training evaluation. Here is how to calculate your current pace and whether you need to accelerate:

- Count your current CRM entries. Subtract this from 100 to find your remaining target.
- Divide remaining target by available research hours today. This is your leads-per-hour target.
- If you need more than 15 leads/hour, switch to Google Maps main bazaar searches — highest density.
- If you are close to 100 (within 20), focus half your time on quality refinement and half on new entries.
- If you already have 100+, spend all of Day 6 on quality pass, priority flagging, and coverage audit documentation.

Day 6 Checklist

- Conducted coverage audit — identified and documented uncovered city areas.
- Researched high-density commercial zones identified in coverage audit.
- Applied advanced scraping techniques to find missed segments.
- CRM now contains 100+ entries.
- Quality pass completed — 70%+ of entries fully filled.
- Top 20 leads flagged as Priority for post-training handover.
- Continued Day 4-5 outreach follow-ups with active leads.
- Any scheduled meetings attended and logged.
- End-of-day report sent to supervisor.

DAY 6 • SECTION 6

Preparing for Day 7 — Final Review

Day 7 is your evaluation and submission day. Everything you have built across Days 2-6 comes together in a final report that your supervisor reviews to determine your training pass/fail status and onboarding confirmation. Use the remainder of Day 6 to prepare.

What Day 7 Evaluates

Evaluation Parameter	Weight	Minimum Threshold
Total Leads in CRM	35%	100+ leads
CRM Data Quality (fill rate)	25%	70% complete fields
Outreach Attempts	20%	20+ messages sent and logged
Demo Conversations or Meetings	15%	3 demos OR 1 meeting
Professionalism & Communication	5%	Daily check-ins submitted, supervisor updated

Day 7 Pre-Preparation Tasks (do these tonight)

- Count total CRM entries and verify all required fields are filled.
- Take a screenshot of your CRM showing the total row count as evidence.
- Review all outreach records — make sure every send has a timestamp and status.
- Prepare a brief summary note: total leads, sources used, outreach count, responses received, demos done, meetings scheduled.
- Draft your Day 7 report in a Google Doc — you will finalize and submit it tomorrow.
- Set an alarm for your Day 7 review call time (provided by supervisor).

DAY 6 • DELIVERABLE

Day 6 Summary & Deliverable

EXPECTED DELIVERABLE

CRM contains 100+ verified leads total, at least 70% with fully completed fields, top 20 leads flagged as Priority, and a city coverage audit documenting geographic areas researched.

WHAT YOU LEARNED TODAY

Topic	Key Takeaway
Coverage Audit	Systematic review of geographic and industry gaps in CRM data
High-Density Areas	Market clusters and commercial zones yield 30-60 leads per 2 hours
Data Quality Pass	10-point checklist ensures CRM is usable by post-training outreach team
Priority Flagging	Top 20 leads identified by specific criteria for maximum conversion potential
Advanced Scraping	Satellite view, nearby feature, category navigation, and post date filters
Day 7 Preparation	Pre-submission checklist completed — ready for final evaluation

✓ Day 6 complete. One day to go. Your training report is due tomorrow — prepare your summary tonight. Tomorrow's review call is your moment to demonstrate everything you have built this week.

Day 6 — Deep Scrape & City Coverage Review

Key Item	Detail
Company	ProgVision Digital — MSME Registered
Product	InstaDemoX — AI website generator in 15 seconds
Website	progvision.online
Product URL	instademox.space
Support Email	support@progvision.online
Phone	+91 7814201332
Admin Email	admin@progvision.online
Pricing — Starter	Rs. 499/month — 1 site, WhatsApp, Google Maps
Pricing — Business	Rs. 999/month — custom domain, cloud hosting
Pricing — Agency	Rs. 2,499/month — 10 sites, SEO, dedicated support
Training Pass Threshold	60% minimum across all 5 evaluation parameters
Day 2 CRM Target	30+ verified leads
Day 3 CRM Target	70+ total leads (multi-source)
Day 4 Outreach Target	20+ WhatsApp messages sent and logged
Day 5 Demo Target	3 demo conversations OR 1 meeting scheduled
Day 6 CRM Target	100+ leads, 70%+ fill rate
Day 7 Submission	Training report to supervisor + support@progvision.online
