

PROGVISION DIGITAL — TRAINING PROGRAM

DAY 1

Business Model Deep-Dive

Focus: Understanding ProgVision & InstaDemoX

progvision.online • instademox.space

MSME Registered Enterprise | UDYAM-AP-23-0076992

DAY 1 • SECTION 1

About ProgVision Digital

ProgVision Digital is an MSME-registered technology company (UDYAM-AP-23-0076992) founded with the mission of building secure, scalable digital products for businesses and startups globally. Headquartered in India with global operations spanning the USA, Europe, Asia, and Japan, ProgVision serves as both a product company and a technology services firm.

The company operates across four core verticals: website and web application development, mobile app development, cybersecurity auditing and consulting, and digital marketing. Each vertical is staffed by specialized engineers and designers who deliver client-specific, production-grade solutions.

PROGVISION SERVICE PORTFOLIO

Service	Description	Target Clients
Web Development	Custom websites, landing pages, SaaS dashboards, e-commerce portals built on modern frameworks	SMBs, startups, enterprise
App Development	iOS and Android native apps, React Native cross-platform, PWAs, and enterprise mobility solutions	Retail, logistics, healthcare
Cybersecurity Audit	VAPT, penetration testing, SIEM setup, CSP analysis, vulnerability reporting and remediation	Fintech, e-commerce, BFSI
Digital Marketing	SEO, paid campaigns, social media management, content strategy, lead generation funnels	Local businesses, D2C brands
InstaDemoX SaaS	AI website generator producing live business sites from Google Maps data in 15 seconds	Local business owners across India

As a candidate joining ProgVision's sales and business development team, your primary focus will be driving adoption of InstaDemoX — the company's flagship SaaS product. Understanding the full service portfolio helps you position InstaDemoX correctly and upsell additional services when clients show interest.

DAY 1 • SECTION 2

InstaDemoX — The Flagship Product

InstaDemoX is ProgVision Digital's next-generation AI-powered website generator. It is the primary product you will be promoting, demonstrating, and selling throughout your engagement. Understanding it deeply is the single most important task of Day 1.

PRODUCT OVERVIEW

Website: instademox.space

InstaDemoX generates fully personalized, production-ready business websites in under 15 seconds. By syncing Google Maps location data, real business reviews, ratings, and WhatsApp communication widgets, it creates a claimable live website for any local business — at zero setup cost to the client.

How InstaDemoX Works — Step by Step

- 1 User visits instademox.space and selects their city from the location selector.
- 2 User types their business name — the system searches Google Maps in real time.
- 3 InstaDemoX fetches the business's name, address, phone number, Google rating, review count, and industry category automatically.
- 4 A fully designed, template-matched website is generated in 12-15 seconds using the fetched data.
- 5 The generated site includes the business's real reviews, a Google Maps widget, a WhatsApp contact button, a direct call button, and a custom claim banner.
- 6 The business owner clicks 'Get It Live' to claim their site with a custom subdomain or their own domain.
- 7 Payment is completed and the site goes live — no developer, no designer, no setup required.

DAY 1 • SECTION 3

Industry Templates & Target Segments

InstaDemoX currently supports 7 fully responsive industry-specific templates, each pre-loaded with relevant service cards, iconography, and call-to-action blocks suited to that business category. Every template is mobile-first and optimized for local customer conversion.

Industry	Template Features	Key CTA
Restaurant & Food	Menu highlights, delivery info, pure veg/non-veg badge, cuisine tags	WhatsApp Order / Call
Salon & Spa	Service menu, pricing tiers, appointment booking prompt, treatment gallery	Book Appointment
Hotel & Hostel	Room types, amenities (WiFi, AC, dining), location map	Check Availability
Clinic & Hospital	Doctor profiles, specializations, OPD timings, emergency contact	Book Consultation
Real Estate	Property listings, location highlights, builder credentials	Request Site Visit
Gym & Fitness	Membership plans, trainer info, batch timings, equipment list	Join Now
School & Education	Courses, admission info, faculty, fee structure highlights	Enquire Now

What Makes InstaDemoX Unique

- Zero manual design work — the business owner has a live site within seconds of inputting their name.
- Real data from Google Maps means every site is already personalized with the actual business info.
- Real reviews and ratings are pulled and displayed — instantly building social proof.
- WhatsApp integration means the first customer conversion can happen directly from the website.
- Claimable live link — the business owns the site and can subscribe to keep it live permanently.
- No developer or hosting knowledge required on the client's end.
- Flexible pricing — suitable for a street-side restaurant at Rs.499/month up to multi-location agencies.

DAY 1 • SECTION 4

Pricing Tiers — Know Every Plan

As a sales team member, you must be able to explain, justify, and recommend the correct pricing plan to each prospect. Memorise these tiers and understand the value proposition of each before you begin outreach.

Plan	Price	Key Features	Best For
Starter	Rs. 499/month	1 generated demo, WhatsApp button, Google Maps integration, custom domain link	Street-side shops, food stalls, solo practitioners
Business Live	Rs. 999/month	All Starter features + custom domain (.com/.in), unlimited call & route actions, free cloud hosting	Restaurants, salons, clinics, gyms, retail stores
Full Agency	Rs. 2,499/month	Manage up to 10 domains, priority SEO submission, dedicated support manager, weekly leads export	Hotel chains, franchise businesses, real estate groups

PRICING STRATEGY TIP

Always lead with the Business Live plan (Rs. 999/month) as your primary pitch — it offers the strongest value-to-price ratio and is the plan most local businesses will convert on. Offer Starter as a low-barrier entry point if they hesitate. Present Agency only for multi-location businesses or those managing more than one property.

Annual Value Calculation (Use in Conversations)

Plan	Monthly	Annual Cost	Value Delivered
Starter	Rs. 499	Rs. 5,988/yr	Live website, WhatsApp leads, Maps integration
Business Live	Rs. 999	Rs. 11,988/yr	Custom domain, unlimited actions, hosting included
Full Agency	Rs. 2,499	Rs. 29,988/yr	10 sites, SEO, dedicated support, lead exports

Compare this to a local web designer charging Rs. 15,000 to Rs. 50,000 as a one-time fee with no ongoing updates, no reviews integration, and no WhatsApp widget. InstaDemoX at Rs. 999/month becomes an obvious choice for any business owner who understands digital presence.

DAY 1 • SECTION 5

Frequently Asked Questions — Client Perspective

These are the most common questions local business owners ask when first encountering InstaDemoX. Study each answer until you can deliver it naturally without reading from a script.

Is there any design or coding work needed from my side?

Absolutely none. You type your business name, we generate the website in 15 seconds. There is no form to fill, no image to upload, no code to write. Everything — your business name, address, phone, Google rating, and reviews — is pulled automatically from Google Maps.

Can I use my own domain name like myrestaurant.com?

Yes, with the Business Live plan (Rs. 999/month) you can map any custom domain — .com, .in, .co.in, or any other extension — directly to your InstaDemoX site. Domain registration is separate but the mapping is handled for you.

How does the WhatsApp widget help my business?

The WhatsApp button appears on your live website and connects directly to your registered WhatsApp number. When a customer visits your site and clicks WhatsApp, they open a direct conversation with you. This removes friction from the customer journey and drives higher conversion than a contact form.

Are the reviews and ratings real or fake?

All ratings and reviews displayed are sourced directly from your Google Maps listing. They are 100% real, publicly visible, and automatically synced. You cannot edit or manipulate them — which is why they build genuine trust with your website visitors.

What happens if I want to change the content after the site is live?

You can update your phone number, WhatsApp number, and contact details at any time through your InstaDemoX dashboard. For content changes beyond that, you can raise a request with our support team at support@progvision.online.

Is there a setup fee or hidden charges?

No setup fee and no hidden charges. You pay only the monthly subscription. The first generated demo is always free to view. You pay when you decide to claim and keep the site live.

DAY 1 • SECTION 6

ProgVision's Mission, Vision & Culture

Before you represent ProgVision to clients, you must genuinely understand what the company stands for. Clients can tell the difference between a salesperson who memorized a pitch and one who truly believes in what they're selling.

Pillar	Description
Mission	Make professional digital presence accessible to every local business in India, regardless of technical skill or budget.
Vision	Become the largest AI-driven website generation platform for local businesses across South and Southeast Asia by 2027.
Core Values	Speed, simplicity, transparency, real data, and customer-first engineering.
MSME Commitment	As a registered MSME (UDYAM-AP-23-0076992), ProgVision is committed to employing and empowering Indian talent at every level.
Global Reach	Operations active in USA, Europe, Asia, and Japan — with India as the primary growth market for InstaDemoX.

Why Local Businesses Need InstaDemoX Right Now

India has over 63 million micro, small, and medium enterprises (MSMEs). According to industry estimates, fewer than 15% have any meaningful online presence. Of those that do, most have outdated, non-mobile-friendly websites that were built years ago by local designers and never updated. This is the market InstaDemoX is built for.

- Google searches for 'restaurants near me', 'salon near me', 'clinic near me' return results where businesses with websites always rank higher than those without.
- WhatsApp is used by over 500 million Indians daily — a WhatsApp button on a website is the most direct sales channel available to a small business owner.
- A business with a 4.5 Google rating and 200 reviews but no website is losing customers to a competitor with a 4.1 rating but a professional website.
- InstaDemoX gives them a professional, functional website in 15 seconds that would otherwise take 2-6 weeks and Rs. 15,000-50,000 with a traditional developer.

■ **Remember: You are not just selling a subscription. You are selling the first legitimate online presence that many of these business owners will ever have. That is a meaningful impact — make sure you convey that conviction in every conversation.**

DAY 1 • SECTION 7

Your Role in the Sales Pipeline

The ProgVision sales pipeline is a structured, collaborative process involving multiple roles working together. As a new team member, it is critical that you understand where your role fits, who you work with, and what success looks like in your position.

Stage	Role Responsible	Activity
Lead Generation	Lead Generation Specialist	Scrape Google Maps, JustDial, IndiaMART — build prospect database
Lead Qualification	Business Development Executive (BDE)	Outreach via WhatsApp/email, qualify interest, book demos
Demo & Proposal	Business Development Associate (BDA)	Conduct demo on instademox.space, send proposal, negotiate
Closing & Upsell	BDA + Client Manager	Close subscription, upsell to higher plan or cybersecurity audit
Onboarding	Associate & Client Manager	Ensure site is live, client trained, satisfaction confirmed
Reporting	All Roles	CRM updated daily, performance metrics reviewed weekly

IMPORTANT: THE 60% RULE

During your 7-day training period, you are expected to achieve a minimum of 60% progress across all deliverables. This is evaluated on Day 7. Candidates who clear 60% are confirmed for full onboarding. Training compensation is credited as part of your first month's salary — so your work during these 7 days is fully paid.

Tools You Will Use

- Google Maps — primary lead sourcing tool for your assigned city.
- Google Sheets / CRM template — shared sheet provided by your supervisor for lead entry.
- WhatsApp — primary outreach channel using approved scripts.
- Email — secondary outreach channel for formal proposals and follow-ups.
- instademox.space — live demo platform for showing clients their generated website.
- ProgVision Portal — your daily check-in, lead logging, and progress tracking platform.

DAY 1 • SECTION 8

Day 1 Study Checklist

Complete each of the following tasks by the end of Day 1. Tick off each item as you finish. Your Day 1 progress is validated through a brief product knowledge check-in with your supervisor.

- Visit progvision.online — read the full homepage, About, Services, and Careers sections.
- Visit instademox.space — explore the full product, click through all demo cards (restaurant, salon, hotel).
- Understand exactly how the 15-second generation process works end to end.
- Memorise all three pricing plans with their exact monthly cost and key feature differentiators.
- Read and understand every FAQ listed in Section 5 of this document.
- Understand the 7 industry templates and which client type each targets.
- Review ProgVision's service portfolio — know all four service verticals.
- Understand your specific role in the sales pipeline and what daily success looks like.
- Save your supervisor's contact number for daily check-ins and progress updates.
- Confirm your assigned city with your supervisor before beginning Day 2.

Self-Assessment Questions

Answer each of these mentally before ending Day 1. If you cannot answer any of them confidently, re-read the relevant section of this document.

- 1 What is InstaDemoX and what does it do in 15 seconds?
- 2 What are the three pricing plans and which would you recommend to a restaurant owner?
- 3 What are ProgVision's four service verticals beyond InstaDemoX?
- 4 If a client says 'I already have a website', what is your response?
- 5 What data does InstaDemoX pull from Google Maps automatically?
- 6 Why is the WhatsApp button the most important feature for a local business owner?
- 7 What industries does InstaDemoX currently serve with dedicated templates?

DAY 1 • DELIVERABLE

Day 1 Summary & Deliverable

EXPECTED DELIVERABLE

Complete product knowledge of ProgVision Digital and InstaDemoX. Be able to explain the product, pricing, and value proposition to any local business owner without referring to notes.

WHAT YOU LEARNED TODAY

Topic	Key Takeaway
ProgVision Digital	MSME-registered tech company with 4 service verticals and global operations
InstaDemoX	AI website generator — 15 seconds, Google Maps data, real reviews, WhatsApp integration
Pricing	Rs. 499 Starter Rs. 999 Business Live Rs. 2,499 Agency
Target Market	63M+ Indian MSMEs, <15% with online presence — massive untapped opportunity
Your Role	Sales pipeline contributor — lead generation, outreach, demo, close
FAQ Mastery	6 core objections memorised and can be answered naturally in conversation

✓ You are now ready for Day 2 — Lead Scraping Foundations. Visit instademox.space one more time tonight and generate a demo for a business in your assigned city to solidify your product understanding.
